

“These warriors are poised for survival and adaption in this ever-changing world which we inhabit.”

The Funguy warrior series is a group of works that have emerged from the northeastern corners of North America in the last couple of years.

The idea of the birth into existence of the Funguy Warriors centers on the search and identification of the "Fungus Among Us", a mysterious growth spreading as of late.

The proliferation of info, false and otherwise, the speed at which its delivered and the all imposing reach it displays has left its mark and new breed of life has emerged.

These warriors are poised for survival and adaption in this ever-changing world in which we inhabit.
